Subject: On-Board and EOM Films on STS-107

There is a high level of interest in seeing the two On-Board Films on STS-107 (FL101 and FL102). These two cameras will be de-stowed on the runway, and expedited to the SSPF. I will coordinate with the Flight Crew Equipment folks to make sure we get access to the Cameras ASAP. We should plan to hold the EOM film courier run to Miami until these films are available. Current schedule has the landing at 0854 on Sat, 1 Feb 03.

Glen, If you do your processing and printing Sunday night, will you be able to ship EOM and On-boards for a Tuesday morning arrival?
